

FELTON ROAD

2009 Felton Road Pinot Noir *Block 5*

Tasting Note

The nose leads with florals: rose petals and violets. The palate is brooding and very textural, showing the huge potential lurking in the shadows. The balance is very much one of rich but fine tannins bouncing off the structure of the acid, with richness coming from the tightly bound fruit. The length of the tannins which echo through the finish indicates this will be a classic vintage.

Introduction

Beginning with meticulous site selection and vineyard design started in 1991, Felton Road's story is one of refusal to compromise. A strict 100% estate policy with fully organic and biodynamic viticulture ensures that our fruit arrives at the winery as pure as it can be, while our entire estate comes as close to true sustainability as is possible. A commitment to hands off winemaking: gravity flow, wild yeasts, wild malo, an avoidance of fining and filtration all help preserve the wine's expression of its terroir. No additions or adjustments are performed unless they absolutely need to be. The result is Riesling, Chardonnay and Pinot Noir which we believe express the authenticity and complexity of our unique vineyards.

Vineyard & Viticulture

Felton Road farms three properties totaling 32 ha in the Bannockburn sub-region of Central Otago. Meticulous summer management of a single vertical shoot positioned (VSP) canopy ensures even and early fruit maturity. Shoot thinning, shoot positioning, leaf plucking, bunch thinning and harvest are all carried out by hand to ensure optimum quality fruit. Cover crops are planted between rows to assist in vine balance and to improve soil health and general biodiversity

Vintage

The season started with a normal spring, neither hot nor cool with normal rainfall. There were the usual occasional frost events that were able to be successfully fought. Good weather over flowering resulted in an excellent fruit set. The summer was on the cool side and then February which is normally our warmest and most stable month, was unseasonably cool and wet (although wet for us is still only 48mm but falling on six occasions). In recognition of the cooler summer and then the cool February we were determined to keep crop levels down, so crop thinned more aggressively than normal. Also in recognition of the wet February, we leaf plucked exposing the fruit which is not usual for us. March was a return to normal warm and stable weather and the vines ripened very smoothly and holding great canopy despite the challenges in the weather.

Vinification

22-30% of the fruit was retained as whole clusters with the remainder carefully de-stemmed directly to the fermenters by gravity without harsh pumping. Long pre-fermentation soaks of 6-8 days prior to fermentation with indigenous yeasts and punched down by hand up to four times per day with a total time on skins of 23 days. Pressed off and drained by gravity immediately to barrel in the underground barrel cellars. The wine spent 18 months in barrel (38% new French) with two rackings and no fining or filtration before bottling in August 2010.
