INTERNATIONAL
WINERIES FOR
CLIMATE ACTION

SILVER MEMBER

has met the requirements of IWCA Silver Membership, as established by the IWCA Standing Rules and as confirmed by a third-party audited, Scopes 1-2-3 GHG inventory that accounts for emissions from: (a) the vineyard to the final disposal of the wine product, and (b) a minimum of 90% of the organization's volume in the region where its main winery is located. IWCA affirms that the above-named winery is working to achieve Net Zero emissions by 2050 at the latest, in recognition of the significant threat climate change holds for our agricultural-based industry and the resulting need to take mitigative action.

GEOGRAPHIC SCOPE OF GHG INVENTORY			
	Baseline Emissions	Current Emissions	% Emissions Change (+/-)
Emissions Intensity kg CO ₂ e / liter
